STAT Outpatient

A comprehensive and integrated, centralized outpatient management solution

Designed with you in mind.

Looking to drastically reduce wait times between your patients' outpatient appointments? The STAT Outpatient solution provides health systems and outpatient care centers a purpose-built integration that caters to the specific needs of their patients throughout their episode of care. Designed as an end-to-end clinical plan, STAT Outpatient empowers medical staff to comprehensively document each patient event and better manage every step of their outpatient journey experience for patients, and care teams.

Increased patient or staff satisfaction? You can have both.

Our solution coordinates all resources along the outpatient episode of care from treatment rooms to equipment use, and support staff. Specialized clinics and outpatient facilities such as cardiology, mental health and oncology that require multiple points of care in one visit, benefit from this system significantly with streamlined care delivery and a higher quality experience for patients and for staff.

✓ **Reduce wait times.**   ✓ **Optimize patient flow.**

SOLUTION FEATURES

- Real-time patient location tracking for optimized time and resource management
- Seamless integration with hospital ADT and all clinical systems for immediate updates
- Flexible interface with the ability to accommodate unplanned medical events and emergencies such as mental health, pregnancy monitoring, chronic illness, and more

- Full visibility of systemwide patient activity displayed on a desktop or large screen
