

Responsive and Professional Support that Maximizes Your Systems Utilization and Lifespan

We fully appreciate the financial and operational constraints you face; we also understand that optimizing costs must go hand in hand with ensuring a high level of support.

As a large independent MVS service organization, we have the necessary scale, resources, and infrastructure to support our customers with highly trained service technicians, an extensive global supplier network and technical partners.

We continue to grow and strengthen our commitment ensuring we provide the best in timely and knowledgeable professional service. Christie Innomed is well positioned to provide unique and cost-effective service solution for your mammography equipment.

You focus on patient care. We handle the rest.

Leave your mammography support needs with a single trusted service provider.

High Quality Maintenance and Services

From preventive maintenance only to comprehensive coverage, we can customize our services to suit your needs. Our strength lies in our years of experience servicing Mammography systems and the depth of the services that we provide. We bring a level of flexibility and contract customization to each account that other vendors cannot.

Time & Material Only

Pay for individual repairs as needed at competitive hourly rates.

Block of Hours

Flat labour fee to fix issues as needed, with access to parts at an added cost.

Preventative Maintenance Only

Low-cost service option for your equipment if you are willing to take more risk.

Shared Service

Best support model for your in-house engineers with customizable risk level.

PM + Pooled Parts

Total protection for your imaging equipment with full-service coverage inclusive of all parts at a fixed cost.

Comprehensive Coverage

Total protection for your clinical equipment and the most peace of mind. Includes labour, standard parts, glassware, detectors, and PM's.
